The Head Kradle Suspension System

Designed with the client's comfort in mind, the **Head Kradle** is a self-adjusting spring loaded suspension system. The **Head Kradle** is crafted of stainless steel and may be easily disinfected. The cushion is constructed with durable vinyl, high density foam, memory foam and fiberfill.

The **Head Kradle's** self-adjusting, spring-loaded mechanism supports the head, face and neck in a neutral and ergonomically correct position.

The **Head Kradle's** unique mechanism adjusts for constant changes in pressure on the entire body during a treatment. Stainless steel universal connecting rods simply adjust to fit any massage table. The Head Kradle was designed and patented by a bodywork practitioner.

Select either half inch or three quarter inch diameter rods.
Designed for bodywork, chiropractic, cosmetic and physical therapy.

The Head Kradle will improve your clients' experience.

"This headrest is terrific. It allows the client with either cervical pain or sinus problems to be able to tolerate the prone position and receive the work they need. An essential to the therapy table that has finally arrived."
